Reasons for Allowance

1. Claim 1 will be allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applicants claimed invention are Franco et al (U.S. 2004/0199574) and Cao et al (U.S. 20030161265).

Franco and Cao are the closest prior art to the claimed language. Both prior arts are related to administrating and monitoring the network. Whereas the networks being taken down in case of fail over and then being transferred to the new operating system However prior art failed to overcome the migration process without making any changes to the operating system and keeping the same operating system by simply loading the software in result of failover of the system. From plurality of the clones one of the clone being submitted for initial software application. Wherein the at least one clone becomes the new primary node and wherein the record of the messages received by the primary node are re-injected into the new primary node (claim1) as disclosed in the specification, "When detecting a fault or an event affecting said main node, switching the service towards at least of said clones, and migrating network connections. Thus with the migration method according to the invention, it is possible as of now, thanks to the migration of the network connections, to make service switching towards clones transparent to the outside world communicating with the application (Page. 3, lines 25-33).

In summary, the Examiner submits that Franco and Cao don't teach all the limitations of independent claims in combination with other elements. Specifically prior art does not teach "updating an account for the subscriber connection in response to modifying the attributes of the subscriber connection that affect a cost of the subscriber connection"; therefore, claims 1-32 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
